

Alberto Ramírez Farfán

Software engineer

Objectives

My goal is to develop in dynamic work environments, quickly adapting to different challenges while applying my knowledge in software engineering and cybersecurity. I aim to improve my customer service skills, collaborate in teams, and continue learning about the tech industry to grow both professionally and personally.

Personal Skills

Extroversion and empathy in customer interactions

High learning capacity and adaptability

Teamwork and problem-solving skills

Languages

Spanish: Native Level

English: C1 Level

French: B2 Level

Academic Background

Bachelor's Degree in Software Engineering

University of Oviedo (2021 - Present)

- Erasmus at *Vilnius Business College* (2024 - 2025), Lithuania

High School Studies

IES Antonio Gala (2019 - 2021), Alhaurín el Grande, Málaga, Spain

Projects

Hotel Reservation Application

Java (Eclipse), WindowBuilder, OOP

Developed a functional application with internationalization and local storage of user and reservation data.

Image Filter Program

C++, Visual Studio, Linux Virtual Machine

Created a program that applies filters like sepia and black-and-white to images passed as parameters.

Data Structure Manager

Java

Implemented nodes (BST and AVL), graphs, hash tables, and search algorithms such as backtracking and branch-and-bound.

Personal Portfolio

HTML, CSS, JavaScript

Developed a responsive web portfolio with dynamic language switching, deployed on GitHub Pages.

Technical Skills

Programming Languages: Java, C++, C, C#, Python, SQL, PHP, JavaScript

Databases: MySQL, MariaDB

Tools & Technologies: Wireshark, Cisco Packet Tracer, VirtualBox, GitHub, Matlab

Development Environments: Eclipse, Visual Studio, Spyder, PyScripter
